The amendment received 9 January 2009 has been made of record. Claims 1-18 are pending.

The rejection under 35 USC 112 is withdrawn in view of applicants' amendments.

Claims 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by each of WO '325 and EP '092.

This rejection is maintained substantially as set forth in the previous office action with the following additional comment.

Applicants have argued that the process step "component A is dissolved in component B" patentably distinguishes over the compositions of the prior art. It is the position of the examiner that, since applicants' dissolution is suitably accomplished by "temperature", the processes of the prior art also accomplish dissolution within the meaning intended by applicants. This is so since the prior art, for example WO '325 at page 9, line 42 to page 10, line 10, disclose mixing the pigment with polymer in the melt. Applicants need demonstrate with factual evidence that their compositions are physically distinct from those of the reference.

Claims 1-14 are allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
